

firstcolo is a carrier-neutral data center operator in Frankfurt am Main, the major financial city with the ECB and the largest international telecommunications hub in Europe. firstcolo operates 2 TÜV Level 3+ data centers and a total of 7 PoPs at strategic locations. The company provides colocation, cloud services, virtual and physical carrier connectivity and managed services to some of the largest German and international global players.

CARRIER CONNECTIVITY

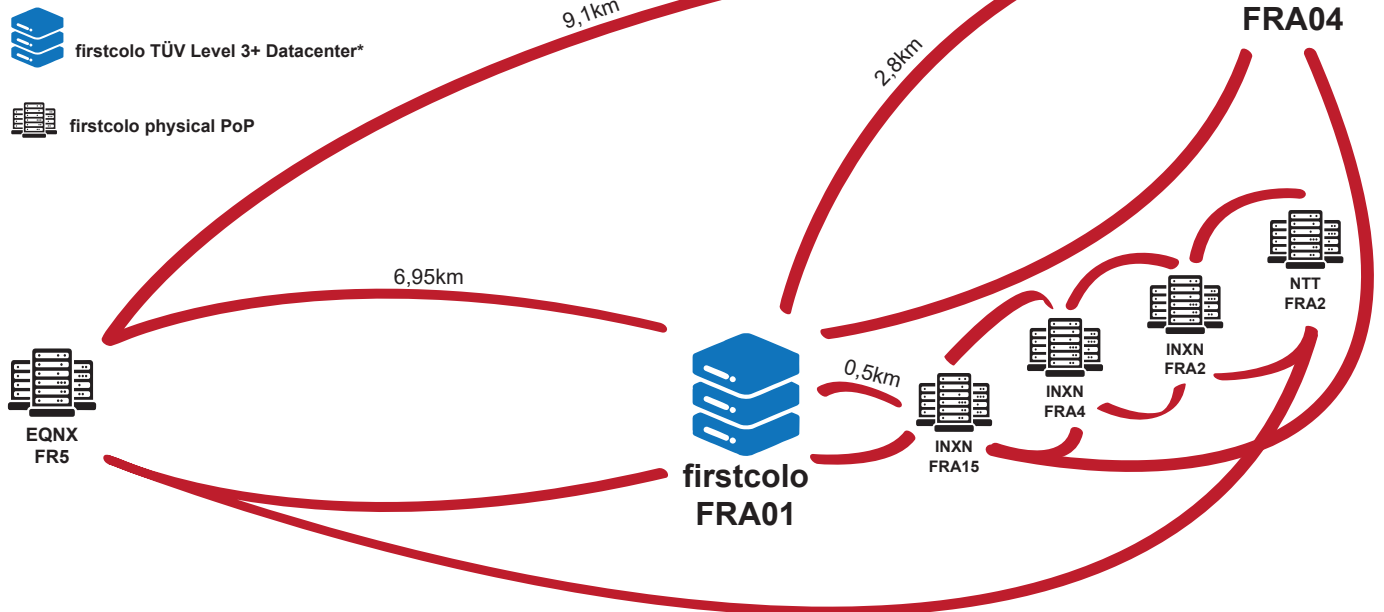

Redundant connectivity via own and leased infrastructure to the most important Telco Hubs and PoPs in Frankfurt am Main.

Connectivity to the largest global data center operators in Frankfurt am Main, the largest verticals from the financial, enterprise, networks and public, private and hybrid cloud sectors.

HQ: firstcolo GmbH, Kruppstrasse 105, 60388 Frankfurt am Main, Germany

firstcolo, carrier-neutral TÜV level 3+ data center, operates 2 own data centers, which are connected with redundant optical fibers to 5 different physical PoPs in Frankfurt.

Through this type of connection, customers have the opportunity to connect to more than 700 carriers and the largest global players on the market from the financial, enterprise, cloud and networks vertical.

*The connections drawn are for illustration purposes only

*Level 3 is characterized by the possibility of carrying out maintenance without interrupting operation, the control of component faults, route or space losses in the electrical supply. Furthermore, there are supplementary requirements in air-conditioning technology, increased requirements for burglar resistance and additional access restrictions. Any existing site risks are compensated for.
